Deforestation is the act of cutting down trees. Deforestation can	
happen in some lands. These lands may be needed for building houses	
or setting up factories. Even building roads needs cutting down trees.	
Deforestation is affecting wildlife as well. Many animals have lost their	
habitats or their places of living. Trees produce oxygen and take in carbon	
diavida It can load to coveral problems it deteroctation is not storiced	
dioxide. It can lead to several problems if deforestation is not stopped. It can lead to global warming. Floods can become uncontrollable as trees	

can protect us from them. Protecting trees should be the top interest of

governments. We should grow more trees in the forest. This would help to resolve the loss of the trees cut down. Moreover, the use of plant-based products should increase.

The Egyptian squash player Nour El Sherbini became the first woman to win the Tournament of Champions three times—and she's not yet 30. In 2009, she became the youngest world champion in the history of the sport when she won the women's title at the World Junior Squash Championships at just nine years old. In 2015, she became the youngest

woman to win the Women's World Championship, which was held in Malaysia, and then a year later retained her title by beating her most recent opponent, El Welily, at the Women's World Championship held in El Gouna, Egypt.

Nour El Sherbini was born on 1st November, 1995 in Alexandria. She started playing squash when she was 6 years old. She is a five time World champion. She is known as the world's best squash player.

3 Read the following text, then answer the questions:

Climate change is the most <u>serious</u> problem at the moment over the world. The reasons for climate change can be divided into two, natural and created by the man. Global warming is the main natural reason and using harmful chemicals in everyday life is the main reason created by man. The climate is changing rapidly without stopping and affects the rise of the Earth's temperature. The global climate change and its results are leaving bad effects on most countries, including temperature rise, greenhouse gases, unusual rainfall, floods, storms, droughts and melting ice.

To reduce the bad effect of climate change, people should be aware. Tree plantation can reduce global warming. Stopping using harmful chemicals can reduce environmental pollution. Students should be careful to protect the environment and raise awareness. Thus, students can play a vital role to reduce the bad effect of climate change.

Last week, I read an article about natural wonders around the world. It mentioned some of the most amazing places on earth. The writer mentioned that there are two kinds of wonders; natural and man-made wonders. I knew that Ancient Greeks made a list of places they thought people should see. This list was named the Seven Wonders of the Ancient World. The Greeks chose seven wonders because they thought this number means perfection. The Lighthouse of Alexandria is one of these wonders. It was once the tallest building in the world. There was a very large mirror

inside this lighthouse. It was used to reflect sunlight to warn ships that were getting close to the shore. At night, a fire was lit inside the lighthouse to guide the sailors in the sea. The design and building of the lighthouse started in 290 B.C. After that, an earthquake damaged it. However, it remained longer than any of the wonders except for the Great Pyramid.

A satellite phone is a telephone that has the ability to connect to orbiting satellites. Similar to usual mobile phones, they can connect to voice and short messaging services as well as internet access. Satellite phones can work anywhere in the world. Satellite phones can connect from anywhere as they are directly connected to satellites around the world and do not depend on usual mobile networks. A satellite phone has basic phone

features but is heavier than cellphones. It can provide wide area coverage. Compared to the usual phone services, the voice quality could be lower and there could be delay in communication. It has the same number and does not change. It does not need any installation or setup. It has a larger external antenna and does not have internal antennas. For internet access, it has low data bandwidths. They are very <u>useful</u> in places far from cities, such as on mountains or in deserts.

Unfortunately, the rainforests are endangered. A study was carried out by researchers, who found that between 2000 and 2017, 14% of the rainforests were lost to deforestation.

The Amazon Rainforest has been described as the "Lungs of our Planet" because it provides the essential environmental world service of continuously recycling carbon dioxide into oxygen. More than 20 percent of the world oxygen is produced in the Amazon Rainforest. The Amazon rainforest is the largest rainforest in the world, covering an area of 6,000,000 km². Lt represents over half of the planet's rainforests.

This region includes nine countries. The majority of the forest is in Brazil, with 60%, followed by Peru with 13%, Colombia with 10%, and with minor amounts in Venezuela, Ecuador, Bolivia, Guyana, Suriname and French Guiana.

The Amazon rainforest is losing about 10,000 acres a day. Since 1988, humans have destroyed an area of the rainforest roughly.

Egypt has the most beautiful natural scenes including the desert, green lands and pure natural pools. Egypt is visited by more than 14 million tourists every year.

Sharm El Luli Beach is located in Marsa Alam. It is one of Egypt's most beautiful Red Sea places. The beautiful beach is a main place for people who travel to Marsa Alam because of its pure and clear blue waters. The underwater

sea life with clean beaches makes it perfect for snorkelling. People love this place for its amazing sea life. You may also be lucky enough to meet the odd sea turtle during your snorkelling or diving trip.

The main attraction of the Sharm El Luli Beach, which is also called Paradise, is its location in the middle of nature. Once you arrive there, you will see just why it gained its top spot on Middle East beach rankings, and the 22nd spot worldwide.

3 Read the following text, then answer the questions:

Recycling means turning the waste materials into some useful materials. It is very important because it is the only way that can reduce pollution. In order to have a better future, it is very important to understand the effect of recycling on the environment. It is the need of the hour as pollution is at its highest, and it is very much important to control it as soon as possible. The materials that can be recycled are known as

recyclable ones. Industrial waste holds the largest part of the total earth's waste. So, industries should plan how to reduce it, and the best way to do that is by using materials that can be recycled.

Every country should create proper awareness among people and industries. Governments of many countries have already started it, the faster and the better. They are also taking initiatives to recycle a huge amount of waste.

Solar energy is energy from the sun, and it's the most sustainable energy source on Earth. Solar power can be captured and used in several ways to generate electrical energy for homes, businesses, and more. Solar power is a clean, renewable source. Solar panels produce electricity by changing the continuous flow of energy from the sun into electricity. No pollution is produced into the air when electricity is produced by solar panels. It doesn't cost much money.

The sun provides more than enough energy to meet the whole world's energy needs, and unlike fossil fuels, it won't run out anytime soon.

No greenhouse gases are produced when you use solar panels to create electricity. The sun provides more energy than we'll ever need, so electricity from solar power is a very important energy source in the move to clean energy production.

Satellites are in an orbit hundreds or even thousands of kilometres above us, they are part of our everyday lives. Farmers use satellite images to know the best time to water their fields and collect their wheat. You can watch your favourite channel from any country by satellite signal. Because of space, you get to cheer on your favourite team during a power play from the comfort of your living room. He shoots, he scores! You can call anyone from anywhere through satellite phone without worrying about the signal!

You can surf the internet using satellite high-speed Internet subscriptions. You can get money anywhere. When you use your card, a satellite link is set up between the business and your bank. Satellites also help the scientists to predict the weather.

Social media has become an essential part of our daily lives. It allows us to communicate with friends and family, share our thoughts and ideas and stay informed about the latest news and events. There are many different social media platforms, such as Facebook, Instagram and Twitter. Each platform has its special advantages. While social media can be fun and useful, it also has its disadvantages. For example, spending too much time on social media can lead to addiction and affect our mental health. It is essential not to let social media control our lives. We can limit our time on these platforms and do other offline activities to be healthy.

"A review of an Egyptian craft"

Egyptian handicrafts are popular with tourists. Weaving is one of the most popular crafts in Upper Egypt. To weave, you need looms, threads and needles. A loom is a machine that crosses threads under and over each other to make fabric. Weavers can make very beautiful things. Unfortunately, there aren't many traditional weavers in Egypt today. To encourage doing that traditional craft, the government is planning to build four new schools to teach weaving in different cities. These schools will have the best weavers all around Egypt. Their job is to teach students how to weave. They also plan to do a recycling project which is connected to weaving. I think weaving is very important for the Egyptian economy.

6 Write a paragraph of ONE HUNDRED and TEN (110) words on: "A short story you read"

I read a short story called "The Clever Fox." The story takes place in a forest where a clever fox lives. One day, the fox finds itself trapped in a hunter's net. The fox starts thinking of a way to escape. The clever fox decides to pretend to be dead, and when the hunter comes, he sees the fox lying still in the net. Believing that the fox is dead, the hunter decides to take it home for dinner. As the hunter carries the fox, it suddenly jumps out of his hands and runs back into the forest. The story teaches us the importance of thinking quickly in difficult situations.

"A short story you read"

I like reading stories. I recently read a short story called "The Necklace" by Guy de Maupassant. The story is about a woman named Mathilde who dreams of living a luxurious life. She borrows a beautiful necklace from a friend to go to a fancy party, but she loses it during the night. Mathilde and her husband spend years working hard to replace the necklace, only to find out later that the original necklace was not real. The story teaches us important lessons about the value of honesty and the dangers of greed. In the end, Mathilde's desire for a luxurious life caused her to suffer more than she ever imagined.

"Your visit to a habitat"

Life in deserts is hard because there's not much food or water. However, plants, animals and people found a way to live there. There are not many animals in the desert, but some animals are able to live in that habitat. Examples of animals that live in hot deserts are lizards, snakes, and camels. Small animals such as lizards live underground to avoid heat. They only come out at night to look for food. Like desert plants, desert animals can live on little water. Most of the water used by these animals comes from seeds that hold and keep water. Camels can live in hot deserts by storing water in their bodies.

Landfills are the earliest form of waste management. Any waste that is not recycled or reused is sent to a landfill site. Landfill sites are found all over the world. Some sites practise 'landraising' (putting rubbish on the ground), and some practise 'landfilling' (filling a hole in the ground with rubbish). Rubbish in landfill sites makes a greenhouse gas called methane, which shares greatly in the process of global warming.

At some level, most of us agree that we should try to avoid, or at least reduce rubbish that we send to landfills. We should live a zero-waste

Egypt has a lot of natural habitats These natural habitats can't be seen in other places all over the world. I visited Al Nayzak Beach and Gebel Elba last summer. Al Nayzak Beach is an amazing natural habitat I give it five stars. It is called the Shooting Star by the locals. Al-Nayzak Lake is famous for its pure water. The lake attracts hundreds of tourists from all over the world, where they are able to dive and swim due to its safe, clean water. Gebel Elba, which is surrounded only by green fields, is one of Egypt's most wonderful places. The Gebel Elba National

Park is in the south-east of the country. I highly recommend visiting it.

Hipparchus was perhaps the greatest astronomer of ancient time. He was born in Nicaea (Turkey now). He built an observatory on the island of Rhodes around 150 BCE. There he measured the positions of objects in the sky. He also divided the stars according to their brightness.

The last great astronomer of the Roman time was Claudius Ptolemy (or Ptolemaeus), who grew in Alexandria in about the year 140. He wrote a book which today is called by its Arabic name, Almagest (meaning "The

هناك عدة أسباب لماذا الرياضة الالكترونية ستصبح أكثر شعبية من الرياضة التقليدية. اللاعبون يمكن أن يلعبوا العاب من الكمبيوتر أو اللابتوب. هذا يسمح لهم أن يدخلوا (يتصلوا ب) هذه الالعاب أينما يكونوا. لهذا فالالعاب الالكترونية سهلة الولوج (الوصول) . لكن يمكن ان يستغرق الأمر بعض الوقت لتعلم كيف تلعب هذه الألعاب.

هيباركوس كان ربما أعظم عالم فلك في التاريخ القديم. ولد في نيقية (تركيا الآن) بني مرصدا في جزيرة رودوس في عام ١٥٠ قبل الميلاد تقريبا. هناك كان يقيس مواضع الاشياء في السماء. هو ايضا قسم النجوم طبقا للمعانها.

آخر الفلكيين العظام في العصر الروماني كان كلوديوس البطلمي (البطليموسي) الذي نشأ في الاسكندرية في عام ١٤٠ تقريبا. كتب كتابا يسمى اليوم باسمه العربي ، الماجيست (تعني العظيم)

"A biography about a person in the media"

There are many famous people who work in the media now and in the past. I think Farouk shousha and Safia el Mohandes are the most important. Farouk Shousha is a well-known radio presenter. In his programmes, he always talked about the beauty of the Arabic Language. He was called the guardian of the Arabic Language. He won many prizes. Safia el- Mohandes was born in Cairo. She was born in 1922. She was the first female voice on the radio. She presented programmes for women and children. She also presented news, educational advice and drama for the whole family. She helped many people in this field. She was called the mother of the broadcasters. She retired in 1982.

Honesty is the main quality in the job of the journalist. The job of a journalist is not an easy one. It needs hard work all around the day. This sometimes requires sleeplessness. Meeting different people and finding out more about the world is a main part of the job. The job includes spending long time on the internet and talking to people on the phone too. Unfortunately, there are some journalists who give fake news and report on unreal facts to attract more readers and earn more money. This is a misuse for the job of a journalist. Finally, I'd like to say that honesty is the most important characteristic that remarks any job.

Recycling means turning the waste materials into some useful materials. It is very important because it is the only way that can reduce pollution. In order to have a better future, it is very important to understand the effect of recycling on the environment. It is the need of the hour as pollution is at the highest, and it is very much important to control it as soon as possible.

The materials that can be recycled are known as recyclable ones. Industrial waste holds the maximum part of the total earth's waste. So, industries should plan how to reduce it, and the best way to do that is by using materials that can be recycled.

Write a paragraph of ONE HUNDRED and TEN (110) words on: "A review of future cities"

How cities will be like in the future? By 2050, cities' services will increase. The internet will be the main service which will make the city smart. Cities will become greener and have more cycle lanes and walking space, along with less pollution. Buildings will produce their own energy from renewable sources and their design will be improved. Buildings will also get their energy sources through solar panels and wind turbines. Cities will have houses for all people, but they will also have big parks. The trees and other plants will give us clean air, and also give a home to animals and birds. People will grow their own food in gardens on roofs.

كيف ستكون المدن في المستقبل؟ بحلول عام ٢٠٥٠ ، خدمات المدن ستزداد. الانترنت سيكون الخدمة الرئيسية و التي ستجعل المدينة ذكية. المدن ستكون أكثر خضرة و طرقها بها حارات للدراجات و أماكن للمشي تزامنا مع تلوث أقل. المباني ستنتج طاقتها الخاصة من مصادر متجددة و ستتطور تصميماتها. ستحصل المباني ايضا على طاقتها من خلال الخلايا الشمسية و توربينات الرياح. المدن ستحوى بيوت لكل الناس ، و لكن ايضا سيكون بها منتزهات ضخمة. الاشجار و النباتات الاخرى ستعطينا هواءا نظيفا و تكون بيت للحيوانات و الطيور. الناس سيزرعون طعامهم الخاص في الحدائق و الاسطح.

Exam 9

Naira and Nader are discussing an environmental problem.

Naira: Hi, Nader, Why do you look so worried?

Nader: (1) Hi, Naira. I'm worried (reading a research) about Pollution.

Naira : Oh! Pollution is terrible!

Nader: (2) That's right . It's dangerous for both the Earth and us!

Naira: (3) How dangerous is it? / What is its bad effect?

Nader: It causes a lot of problems to the environment.

Naira : Absolutely! Besides, pollution causes climate change.

Nader: (4)What do you think we should do? / What should we do?

Naira: I think that we should start initiatives for encourage people to

help reduce pollution.

Nader: (5) That's a good idea. / Let's do that.

نيرة و نادر يناقشان مشكلة بيئية

نيرة: هاى نادر. لماذا يبدوا عليك القلق؟

نادر : هاى نيرة. أنا قلق (أقرأ بحث) بشأن التلوث.

نيرة: أوه! التلوث فظيع.

نادر : هذا صحيح. انه خطر على الارض و علينا معا.

نيرة : ما مدى خطورته؟ / ما هو تأثيره الضار؟

نادر: انه يسبب الكثير من المشكلات للبيئة.

يرة: بالتأكيد! إضافة الى انه يسبب التغير المناخي.

نادر : ماذا تعتقدين ما يجب علينا فعله؟

نيرة: أعتقد أننا يجب أن نبدأ مبادرات لتشجيع

الناس أن يساعدوا في تقليل التلوث.

نادر : انها فكرة جيدة / لنفعل ذلك.

The space shuttle مركبة نضائية Columbia was named after the first American ship orbited the globe. Space shuttle Columbia was the first shuttle to reach space when it was launched from NASA on April 12th, 1981. The mission had a two-person crew: John Young and Bob Crippen. The aim was to make sure that Columbia worked well in space. Columbia returned from its first mission safely and several more test flights ran between 1981 and 1982.

المركبة الفضائية كولومبيا تمت تسميتها على اسم أول سفينة أمريكية تدور حول الأرض. المركبة الفضائية كولومبيا كانت أول مركبة تصل الفضاء عندما تم اطلاقها من قبل ناسا في ١٢ ابريل عام ١٩٨١. المهمة كانت لفريق من شخصين: جون يونج و بوب كرببون. كان الهدف هو التأكد أن كولومبيا تعمل جيدا في الفضاء. عادت كولومبيا من أول مهمة لها سالمة و جرت عدة رحلات طيران تجريبية بين عام ١٩٨١ و

.1982

Columbia carried a lot of astronauts into space during the next two decades. Space shuttle Columbia's final mission ended in disaster. The shuttle and seven-member crew were lost over Texas when Columbia burned up during return on February 1st, 2003. Columbia's loss encouraged NASA to do extra safety checks in orbit for all future missions.

حملت كولومبيا الكثير من رواد الفضاء إلى الفضاء أثناء العقدين التاليين. آخر مهمة لمركبة الفضاء كولومبيا انتهت بكارثة. المركبة و طاقم عمل من سبعة اشخاص فقدوا فوق تكساس عندما احترقت كولومبيا اثناء العودة في أول فبراير عام ٢٠٠٣ . فقدان كولومبيا شجع ناسا أن تجرى اختبارات امان اثناء الدوران لكل المهام المستقبلية.

A) Choose the correct answer from a, b, c or d:

- The passage is about
 - a) Nasa

b) Columbia's space missions

c) space shuttle

- d) Columbia's loss
- - a) 5 .

b) 10

c) 15

- d) 20
- The first flight into space with Columbia had ______persons.
 - a) two

b) three

c) four

d) five

B) Answer the following questions:

What was the goal of launching Space shuttle Columbia for the f time?

It was to make sure that Columbia worked well in space.

· = كولومبيا حملت رواد فضاء إلى الفضاء لقرابة الـ · ٢ سنة . { في النص ذكرت كلمة عقدين يعني ٢٠ سنة }

= القطعة عن مهام مركبة الفضاء كولومبيا.

٣ = أول رحلة إلى الفضاء مع كولومبيا كان معها شخصين ٤ = ماذا كان هدف اطلاق مركبة الفضاء كولومبيا لأول

= كان الهدف هو التأكد أن كولومبيا تعمل جيدا في الفضاء. ه = هل تعتقد أن مركبة الفضاء كولومبيا نجحت في مهمتها الأولى؟ كيف تعرف؟

= لأنها عادت سالمة و جرت عدة رحلات طيران تجرببية بعد

٦ = كيف ساعد فقدان كولومبيا ناسا في عام ٢٠٠٣ ؟

O Do you think that Space shuttle Columbia succeed in its first mission? How do you know?

Yes, because it returned safely and more test flights ran after that.

6 How was the loss of Columbia in 2003 helped NASA?

It encouraged NASA to do extra safety checks in orbit for all future missions.

fossil - greenhouse - happens - forms - happened - green glass

Climate change has (1) happened because of us. Human activities are producing huge amounts of (2) greenhouse gases into our air. These are made when we burn (3) fossil fuels – such as coal, oil and gas to make electricity, run cars and other (4) forms of transport, and power for industry.

Read the following text, then answer the questions:

Solar energy is energy from the sun, and it's the most abundant وفيرة energy source on Earth. Solar power can be captured and used in several ways to generate electrical energy for homes, businesses, and more. Solar power is a clean, renewable source. Solar panels produce electricity by changing the continuous flow of energy from the sun into electricity. No pollution is produced into the air when electricity is produced by solar panels. It doesn't cost much money.

The sun provides more than enough energy to meet the whole world's energy needs, and unlike fossil fuels, it won't run out anytime soon.

تغير المناخ قد حدث بسببنا. نشاطات البشر تنتج كميات ضخمة من غازات الاحتباس الحراري إلى هوائنا. هذا يحدث عندما نحرق الوقود الحفري مثل الفحم ، البترول و الغاز لكي ننتج الكهرباء ، نشغل السيارات و أشكال (أنواع) المواصلات الأخرى و محطات الطاقة الصناعية.

الطاقة الشمسية هي الطاقة من الشمس، و هي مصدر الطاقة الأكثر وفرة على الارض. محطات الطاقة الشمسية يمكن أن تتكون و تستخدم بطرق عديدة لتوليد الكهرباء للبيوت ، المصانع و الكثير. الطاقة الشمسية مصدر نظيف و متجدد. اللوحات الشمسية تنتج الكهرباء بتغيير التدفق المستمر للطاقة من الشمس إلى كهرباء. لا يتم احداث تلوث غلى الهواء عندما تنتج الكهرباء بواسطة اللوحات الشمسية. لا تكلف أموال كثيرة. الشمس تمدنا بطاقة أكثر من كافية لتلبية احتياجات العالم بأكمله من الطاقة وعكس الوقود الحفرى......

No greenhouse gases are produced when you use solar panels to create electricity. The sun provides more energy than we'll ever need, so electricity from solar power is a very important energy source in the move to clean energy production.

لن تنفذ (تنتهى) فى أى وقت قريب. لا يتم انتاج غازات الاحتباس الحرارى عندما نستخدم اللوحات الشمسية لانتاج الكهرباء. الشمس توفر طاقة اكثر مما سنحتاج يوما لذلك الكهرباء من محطات الطاقة الشمسية مصدر مهم جدا للطاقة فى طربقنا لانتاج طاقة نظيفة.

A carbon footprint انبعاثات الكربون is the total amount of greenhouse gases (including carbon dioxide and methane) that are produced by our actions. Globally, the average carbon footprint for a person is closer to 4 tons. To have the best chance of avoiding a 2°C rise in global temperatures, the average global carbon footprint per year needs to drop to under 2 tons by 2050. By making small changes to our actions, like eating less meat, taking fewer connecting flights and line drying our clothes, we can start making a big difference.

رزق: أعتقد أن هذا محتمل جدا.

الاقمار الصناعية مهمة لنا في نواحي كثيرة. هم يوفروا لنا الراديو و تلفزيون الكابل. هم يسمحوا لنا بأن نعمل مكالمات لمسافات طوبلة. هم يوفروا لنا نظام تموضع عالمي (جي بي اس) حتى نعرف جيدا أين نحن و يمكننا أن نجد الاتجاهات لأى مكان نريد أن نذهب

انبعاثات الكربون هي الكمية الكلية لغازات الاحتباس الحراري (ثاني أكسيد الكربون و الميثان) التي يتم انتاجها بأفعالنا. عالميا، متوسط انبعاثات الكربون للشخص تقترب من ٤ طن. لكي يكون عندنا الفرصة الافضل لتجنب ارتفاع درجة حرارة الكوكب نحتاج ان بمقدار درجتين سيلزبوس ينحفض متوسط انبعاث الكربون تحت الطنين (٢ طن) بحلول عام ٢٠٥٠ . باحداث بعض التغييرات لأفعالنا مثل أكل لحوم أقل ، ركوب رحلات طائرات أقل ، تجفيف ثيابنا بحبل الغسيل، يمكننا أن نبدأ باحداث فرق كبير.

One of the most effective ways to begin thinking about how to reduce your carbon footprint is to rethink how much, and how often, you travel. Fly Less, Taking one fewer long round-trip flight could reduce your personal carbon footprint. Drive less. You can use public transport. If necessary, buy a new car such as the electric one.

أحد أكثر الطرق فعالية لكي تبدأ بالتفكير في كيف تقلل انبعاث الكربون الخاص بك هي ان تعيد التفكير في كم عدد سفرباتك . تنقل بالطائرة بصورة أقل. تقليل رحلة ذهاب و اياب يمكن ان يقلل انبعاث الكربون الخاص بك. يمكنك ان تستخدم المواصلات العامة ، في حالة الضرورة ، اشترى سيارة جديدة مثل السيارات الكهربية.

pollution - governor - are going - will - population - apartments

We have just heard that the government is going to do a lot of projects in the capital! They are going to build many blocks with many apartments. The governor said that the city needs more houses for its population. I think there won't be housing problems in Egypt in the future.

Read the following text, then answer the questions:

Deforestation is the act of cutting down trees. Deforestation can happen in some lands. These lands may be needed for building houses or setting up factories. Even building roads need cutting down trees. Deforestation is affecting wildlife as well. Many animals have lost their habitat or their place of living. Trees produce oxygen and take in carbon dioxide. It can lead to several problems if deforestation is not stopped. It can lead to global warming. Floods can become uncontrollable as trees can protect us from them. Protecting trees should be the top interest of governments. We should grow more trees in the forest. This would help to resolve the loss of the trees cut down. Moreover, the use of plant-based products should increase.

لقد سمعنا للتو أن الحكومة سوف تقوم بعمل مشروعات كثيرة في العاصمة! هم سوف يبنون عمارات كثيرة بشقق كثيرة. المحافظ قال أن المدينة تحتاج بيوت كثيرة لسكانها. أعتقد انه لن يوجد مشاكل سكن في مصر في المستقبل.

ازالة الغابات هو فعل قطع الاشجار. يمكن ان يحدث ازالة الغابات في بعض الاراضي. هذه الاراضي ربما يتم الحاجة اليها لبناء بيوت أو انشاء مصانع. حتى بناء الطرق يحتاج قطع الاشجار. ازالة الغابات يؤثر على الحياة البرية ايضا. حيوانات كثيرة فقدت مواطنها أو أماكن عيشها. الاشجار تنتج الاوكسجين و تأخذ ثاني أكسيد الكربون. يمكن ان يؤدى الأمر لمشاكل عديدة اذا لم يتوقف ازالة الغابات. يمكن أن يؤدي الى الاحتباس الحراري.

Beauty is the main character of the book. In this book, the horse tells a story about his own life and experiences. When Beauty is four years old, Farmer Grey trains him to carry people on his back and pull carriages. When he gets older, he is sold to Squire Gordon at Birtwick Park. This is where he gets his name "Black Beauty" because he was a beautiful black horse with a white star on his head. Black Beauty meets many people, the kind and the cruel. He also makes new friends. Final Exams

The size of the homes will be another important thing as the population rises, so houses will provide us with everything, but in small sizes. The use of water will be important as clean water is becoming limited, so the homes will have to be equipped with devices which use less water to reduce our use.

"A review of social media"

Social media has become the main source of news. These days 68% of people who have internet access get their news from social media. Although this means that we can find news easily and get regular updates on our phones. In my opinion, I think that social media has a negative impact on news and society. News, which is often bad, can make people stressed and worried. Furthermore, not everything we read or see on social media is true. If we share it, before checking the facts, we might spread false information. In turn, this means that the public stops trusting journalists and news in general.
